Motivation for applying

This opportunity is more than just a chance to study abroad for me, it represents the beginning of a lifelong dream. Japan has always captured my heart not only because of its rich culture and history, but also because of the warmth and spirit of its people. I have longed to walk among the cherry blossoms, to immerse myself in the traditions, and to embrace the unique experience of being a foreign student in a land that feels so far yet so close to my heart.

This will be my first major achievement, one that will define who I am and shape who I will become. I refuse to let this chance slip away, for it offers me not only the opportunity to grow academically but to enrich my soul in ways I have only ever dreamed of. I want to seize every benefit this journey offers and give my all, knowing that this experience will become a story I carry with me forever one written in the beauty of Japan and the strength of my dreams

Personal preference field (in particular not limited to study field, class schedule, language learning, support service, Additional needs etc.)

I like to study about software and machine learning, about the language i would like to try learn kanji because I heard its to hard to learn the language. And I think I need someone who can guide me and teaching me about the culture in Japan
